RE Docket ID No. EPA-HQ-OAR-2013-0602 - Foundation Support for EPA's
Proposed Clean Power Plan for Existing Power Plants

Dear Administrator McCarthy:

We, the undersigned 67 foundations with interests in the environment, represent all 10 EPA regions and \$7.25 billion in assets. We strongly support the principles behind the draft Carbon Pollution Standard for existing power plants released on June 2, 2014. The draft represents a critical step in moving our country towards a clean energy economy.

We know that tackling climate change is one of America's greatest economic opportunities of the 21st century and we applaud the EPA for taking steps to help the country seize that opportunity. We believe that it is imperative to act on climate change for our economy, our health, our children and future generations.

We further recognize the importance of states' rights in choosing a path that is most effective and efficient for a state or a region, such as the Regional Greenhouse Gas Initiative (RGGI).

We applaud the administration for its commitment to tackling climate change and we encourage you to complete and implement your proposed standards as expeditiously as possible.

Thank you for your leadership,
